Art Unit: 2665

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being participated by Prieto, Jr, et al (U.S Patent No. 6,381,228 B1).

Regarding claim 1, Prieto discloses a resource manager for a satellite telecommunication system including a plurality of user stations and at least one satellite (transmission resource for a satellite and multiple user, col.2 lines 60-65), the resource manager including a congestion controller that assigns resources to uplinks (MAC controller & FCM 38, col.8 lines 10-20, figure 3), a demand assignment device that assigns resources to uplinks, and, for each satellite (MAC & processor module 34, col.8 lines 55-65), a central entity (system 26, figure 3) that includes:

a subsystem of the congestion controller (MAC controller & FCM, figure 3) adapted to:

receive requests sent by user stations of said satellite, each request expressing the bit rate (bandwidth resource, col.17 lines 18-20) necessary for a

Application/Control Number: 09/902,752

Art Unit: 2665

group of connections supported by a user station and by the same downlink of the satellite (co.7 lines 47-55), and

determine the bit rate authorized for the group of connections (col.8 lines 60-65), and

a subsystem of the demand assignment device adapted to allocate resources to an uplink, at each user station (MAC & processor module 34, col.8 lines 55-65), as a function of said bit rates authorized by said subsystem of the congestion controller and globally for all connections supported by said user station (figure 3).

Regarding claim 3, Prieto discloses that for each user station, said subsystem of said demand assignment device situated in the central entity is adapted to allocate resources to said downlinks (col.8 lines 55-65) on demand so that the sum of the bit rates assigned to the various connections supported by the same downlink is always less than (or at least equal) the maximum bit rate permitted for said link (inherent in the method of allocating bandwidth of Prieto disclosed in col.8 lines 55-65 and col.10 lines 40-50), to prevent congestion on said downlinks (figures 5, 6).

Allowable Subject Matter

3. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Application/Control Number: 09/902,752

Art Unit: 2665

4. Any inquiry concerning this communication or earlier communication from the

examiner should be directed to Thien Tran whose telephone number is (571) 272-3156.

The examiner can normally be reached on Monday-Friday from 8:30AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

Page 4

supervisor, Huy Vu, can be reached on (571) 272-3155. Any inquiry of a general nature

of relating to the status of this application or proceeding should be directed to the Group

receptionist whose telephone number is (571) 272-2600.

5. Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have any questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197.
